

Hello MPN at Microsoft,

Seriously I am asking for you to sell office 2003 again. Treat this comment with possibilities... lately you are getting too complicated and some people are moving into an Open Office... now is the time that take a risk on something that was so awesome. I just installed 2003 and like it better than 2010. sorry but as for me ease is an EM or rather an Accessibility issue...

Chris,
