Data conference worldwide 1 DCW

Crioner si esto muevo

open this world, for the sake of data translation

This is a concept
For the sake of all
Data in the entire
Time and code for
Codes sake. To
Incorporate a sync
Code to share info-
Mation through out
The time we will have
The data we have now
And forever. Some
Universal parts of
Script that will make
Sense today and
Tomorrow. A thing
Called intelligent
Data Sharing and
Encryption

"One for all and all for one"
