

To oppose a nuclear destructive demonstration is to simply build a topical cause with good better, or great, may be even perfect circumstance from a super individualist {so to speak. } for example the issue is the cause and effect reaction of a purpose and what kind of circumstances are there. This is simply a philosophical insight to why things happen and who or what the effects are to and vice a versa To imagine that I'm just an artist is to say to the rest of the world, I make art. To the rest of history I examine the times before me and learn and then eventually I may help shape the future. That is to be in an abstract poetic sense of the artistry hood I'm having.
